

CAST IRON COVER D 400

REF. TAMPA-D400

Characteristics:

Cast Iron cover manufactured in accordance with ISO 1083 (1987) according to class D 400 of UNE-EN-124 (1995), Inscribed with the caption 'Water Treatment'.

Description:

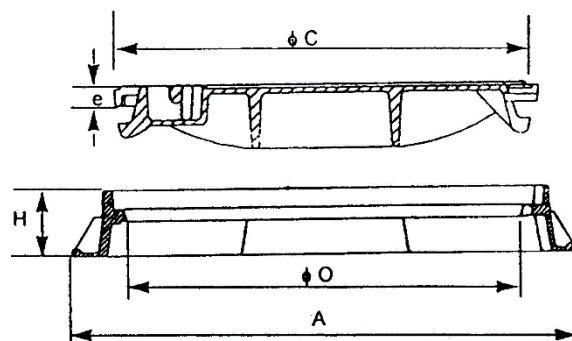

Circular cover closes with support rim, by means of a safety device. The lid has an anti-noise and anti-slip polyethylene gasket. The rim surface with alveoli optimizes its installation as well as the 4 holes to place it safely on the ground.

Installation Zones:

Paved roads, berms, pedestrian paths and parking lots.

(Group 4 of the 1995 UNE-EN-124 standard)
